

Protection Made Easy.

ONGUARD™ System from B. Braun

“The right choice for progressive offices infusing oncology drugs”

Safe, simple handling of hazardous medications

Features

- Closed Drug Transfer Device (CSTD)
- Extensive testing with cytotoxic agents (i.e. Doxorubicin HCl, Etoposide, Carboplatin & Cyclophosphamide)
- Fewer Components
- 0.2 micron filter and charcoal binding matrix
- Tactile and audible feedback

Functions

- Meets NIOSH Definition of a CSTD
- Demonstrates the effectiveness of the closed system
- Ease of use and minimal inventory
- Safely contains drug in liquid, gaseous, and particulate form during admixture, transport, administration and disposal
- Click access confirms connection

Benefits

- Alternative to an expensive clean room for mixing hazardous medication
- Protects clinician and staff from exposure to hazardous medications
- Integrates easily into practice
- Protects clinician and staff from exposure to hazardous medications
- Adds level of confidence for clinician and staff

Safe Handling of Hazardous Drugs

SUMMARY:

- Use a proper containment device: preferably a 100% vented biological safety cabinet or compounding aseptic containment isolator. A horizontal laminar flow hood (clean bench) only protects the drug and not the worker. [OSHA 1999; NIOSH 2004; ASHP 2006; USP 2008]
- Use a proper closed-system drug transfer device (CSTD) in low-volume facilities (e.g. 2 or less drug preparations per week) without a clean room. [NIOSH 2004; USP 2008]

ONGUARD™ Closed Medication System with Tevadaptor™ Components

APPLICATIONS:

- The ONGUARD™ vial adaptor contains a vial converter ring that allows you to use it with both 13 and 20 mm vials. This is ideal for small dose chemo drugs.
- Demonstrated to contain cytotoxic agents including: Doxorubicin HCl, Etoposide, Carboplatin and Cyclophosphamide.
- Safely contains drug in liquid, gaseous, and particulate form during admixture, transport, administration and disposal

CHECK-OFF & ECHO NOTES

Check-Off (Qualify)

Identify if a B. Braun rep has recently discussed the ONGUARD™ System.

Doctor, are you familiar with the ONGUARD™ closed system drug transfer device from B Braun?

If **YES**, confirm benefits

If **NO**, review the ONGUARD™ system and the importance of using it

Confidence

Doctor, I am confident that the ONGUARD™ Closed Medication System provides for staff safety when reconstituting, compounding and administering hazardous drugs by minimizing the risk of exposure, eliminating the need for an expensive clean room and opening your opportunities for administering chemotherapy.

Invitation to neutral

Let's review the key benefits of ONGUARD™...

It's the customer's decision

... then you can determine if you wish to begin utilizing ONGUARD™ for those drugs which are known to pose risks to you and your staff.
