Lyme and leptospirosis protection.

TOGETHER IN ONE SOLUTION.

DURAMUNE® OFFERS THE FIRST AND ONLY COMBINATION VACCINES TO PROTECT AGAINST BOTH LYME DISEASE AND LEPTOSPIROSIS.

As you vaccinate against Lyme disease, consider the reasons to protect your patients from leptospirosis as well.

Both Lyme disease and leptospirosis pose serious outdoor threats for dogs.¹

- All breeds and sizes
- In cities and suburbs—as well as in rural areas
- Who spend even just a few minutes outdoors

Vaccinating against both Lyme disease and leptospirosis is a smart way to offer great protection to your patients. So is choosing the trusted combination of protection offered by DURAMUNE.

FEATURING UNIQUE COMBINATIONS AND ADVANCED TECHNOLOGY.

DURAMUNE

Proven effectiveness against both diseases with fewer injections

PUREFIL TECHNOLOGY

Designed to reduce vaccine reactions associated with extraneous proteins and cellular debris
PROTECTION AND CONVENIENCE... WITH FEWER INJECTIONS.

Only Duramune® offers protection against both Lyme and leptospirosis in one vaccine.

**LYME**

The safe multi-Osp* protection against Lyme you know.

- A multi-Osp immune response can target the many shifting Osp expressions of *Borrelia burgdorferi*.
- Proven safe even in Lyme-positive dogs.

*Osp=outer surface protein.

**LEPTO**

Plus proven leptospirosis protection with enhanced safety.

- The first 4-serovar vaccine to protect against emerging leptospirosis serovars *Leptospira grippotyphosa* and *L. pomona*.
- The only leptospirosis vaccine to undergo exclusive, 4-part Subunit Purification™ to remove cellular debris and purify immunogens for enhanced safety and a smooth injection.

MULTIPLE COMBINATIONS TO MEET THE NEEDS OF YOUR PRACTICE.

Address these threats with 4 different combinations that best fit your protocols—each including Lyme and leptospirosis.
