A happy pet has a “forever home.”
The #1 reason dogs are surrendered to animal shelters is bad behavior.¹

Anxiety, fear, and stress play major roles in a majority of canine and feline behavioral disorders.²

Fear and anxiety disorders affect an estimated 23 million dogs in the U.S.³

In pet cats, behavior problems are still the most common cause of euthanasia.⁴

Up to 54% of pet owners whose pets have behavioral issues have NOT consulted a veterinarian.⁵

Pet owners are more likely to consult free help options such as: the internet, trainers, breeders, and friends.⁵

Veterinarians lose up to 15% of their client base each year due to unresolved behavioral issues.⁶
L-theanine blocks excitatory glutamate receptors at the synapse while also stimulating the production of alpha brain waves throughout the brain.\textsuperscript{11,12}

Magnolia and Phellodendron extracts contain compounds which enhance the release of stabilizing GABA while blocking the release of glutamate at the synapse.\textsuperscript{9,10,14,15}

Whey protein concentrate supplements amino acid precursors required to synthesize serotonin and glutathione.\textsuperscript{13,16}
The combination of Magnolia and Phellodendron extracts appear to be synergistic, with the combination controlling stress and anxiety more effectively than either compound used alone. 

An amino acid found naturally in green tea. It directly stimulates the production of alpha brain waves, which create a state of deep relaxation, wakefulness, and mental awareness.

Contains NMXSL005™ a trademarked high quality protein source which supplements essential amino acids including the precursors of glutathione and serotonin.

L-theanine
Magnolia/Phellodendron
Whey Protein Concentrate

Solliquin™ contains multiple active ingredients all in one chewable supplement.

Solliquin is for dogs and cats to help support normal behavior and facilitate a calming effect.
At the first sign of client complaint, veterinarians should initiate management. Ask direct questions.

**Are you having any trouble with destructiveness or house soiling?**

Solliquin is formulated to help facilitate contentment during periods of adjustment in a pet’s daily routine.

**Common causes of anxiety**
- Fireworks
- Being Home Alone
- Thunderstorms
- Moving
- Kenneling
- Car Rides
- Aging

**Unfamiliar People**
- Unfamiliar Pets
- Crating
- New Smells
- Environmental Changes
- Multi-Cat Household

**Traveling/Transportation**
- Loud Noises

**A COMPREHENSIVE APPROACH FOR BEHAVIORAL DISORDERS:**

- **Avoidance of Fear**
- **Behavioral Modification/Conditioning**
- **Anxiolytics**

The specific cause of a pet’s anxiety may be difficult to isolate, and many anxiety issues occur in combination. The proper approach should be multi-modal.
“I encourage clients to administer a behavioral nutritional supplement for at least 4-6 weeks. While some benefits are apparent immediately, the full effect may be more noticeable in the second month of continuous administration.”  –Theresa L. DePorter, DVM, MRCVS, DECAWBM, DACVB

- Relaxation without sedation
- Intended for daily use
- Tasty chewables
