The CO2 Easy is a detection device for the proper placement of an endotracheal tube or other airway device. The pH sensitive indicator uses a purple to yellow color change when CO2 is exhaled.

- Designed for fast, easy airway assessment
- Large visual indicator
- Can indicate open airway
- Verifies proper endotracheal tube placement
- Built-in bacterial filter
- 3 year shelf life
- Placed onto standard 15 mm endotracheal fitting and 22mm connector to resuscitation bag or anesthesia circuit.
- Designed as a single use human item, but proper storage can allow it to be used repeatedly over a period of a few weeks
- For veterinary use only.
